

Per-class validation F1 over rounds (Flower runtime, $n = 10$ paired seeds, mean $\pm$ SEM)

Notes:

Flower runtime, $n = 10$
paired seeds, engineered
partition, no system het.

Curves: mean $\pm$ SEM of
val_f1_class_c over rounds.

Δ_{test} = paired mean
FedProx – FedAvg on the
test set at best-val round.

Melanoma is the only class
with $\Delta_{\text{test}} > +0.08$
on this runtime.
