

Per-class validation F1 over rounds (pure-PyTorch headline, $n = 10$ paired seeds, mean $\pm$ SEM)

Notes:

Mean $\pm$ SEM across 10 paired seeds, pure-PyTorch, engineered partition.

Validation set only; test-set per-class Δ and Holm-corrected p -values are reported in Table T02.

Melanocytic nevi (majority class) is held by every client in the engineered partition.
